Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A mesogenic mixture (claims 1-20) or a chiral or achiral rod shape compound (claims 21-35) and polymer used in optical or electro-optical components (claims 36-44).

Applicant is required, in reply to this action, to *elect a single specific species (compound or mixture) including the notations (variables) used in formulae* to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

The mixture (claims 1-20) and compound (claims 21-35) have enormous permutations for the formulae.

The following claim(s) are generic: claims 1 and 21.

2. It is noted that claims 36, 39-41 and 43 having the claim language "use of" is not the standard practice for US patent system. See paragraphs below

Claim 36, 39-41 and 43 provide for the use of compound, mixture and polymer but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced. Claims 36, 39-41 and 43 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).
